SPECIAL SEED BARGAINS

Our February Circular offers Exceptional Values

Early buying proving very profitable and satisfactory. Our friends, who buy now, will be delighted with the fine quality and the saving they can effect.

DO YOU WANT OUR CATALOG?

Our big Seed Guide all devoted to field and grass seeds is ready to mail to you. It contains a vast amount of valuable information and is free for the asking.

We want every farmer interested in better seeds and better crops to have our catalog. If you do not have one write us a card and we will gladly send you a free copy with any samples you may wish. We believe our catalog to be the best and most appreciated by the farmer of any he receives. It is not filled with "hot air" but facts concerning crops that are of vital interest to the progressive farmer. If there is any special information concerning any particular crop or any samples desired, always be free to write us and we will give your letter a prompt answer and the best information at hand. We want to hear from you.

SEEDS OF ALL KIND IN DEMAND

We have not experienced anything like the demand for seeds that we are having at this time since the spring of 1920. The short seed crops and bad condition in the fall for harvesting has produced unusual conditions and seeds of all kind are in demand. We are having a phenomenal call for grass seeds. The shortage on clover has made a big demand for this crop but other legumes are just as popular. We are selling more Sweet Clover, Alfalfa and Alsike than ever before in proportion to our sales.

Forage crops which are comparatively low in price are in brisk demand. A large acreage of Sudan will be seeded and it is surprising to see the abnormal demand there is for Soy Beans. A farmer who does not know of the merit and value of this crop is a back number.

Seed corn is the talk of the neighborhood. Farmers throughout the central corn belt are becoming convinced that there is no such "animal" as good seed corn in the 1923 crop, unless they picked it early and dried it before the freezes. We are handling practically all 1922 crop so that we can guarantee high germination and sell seed that will grow without a doubt.

On account of the big demand for seeds and the shortages which are developing daily every wise farmer should buy early. Be sure of the best seed by acting now. Our supplies are complete but 30 or 60 days later many varieties will be sold out and impossible to replace at any price. We cannot urge you too strongly to buy now. You have everything to gain by ordering today. Prices will be higher on most items and the quality will be poorer as the season advances. Today is the time to buy your seeds if you have not already supplied your wants.

SAVE MONEY BY BUYING DIRECT

It is our aim to keep our Pinnacle Brand at the top of the best in the way of high quality. We do not believe you can buy any seed that will prove more satisfactory or that will give better results. When you can buy seed of the highest quality at the low prices we are quoting it is unnecessary for us to tell you that we can save you money. You can appreciate our high quality by the samples already submitted and our prices speak for themselves. If you want further evidences of our qualities we will be glad to send more samples with special prices on large amounts. We pride ourselves on being able to sell field seeds at wholesale prices to the farmer. Our prices are frequently lower than dealers are paying. We only solicit your order with the distinct understanding that we can save you money. Our business is built up on the solid foundation of giving the biggest values in seed it is possible to buy with the American dollar.

Our big success is due to our giving more for your money than you can get elsewhere. We want to serve more customers every year. We can only do this by saving you money and delivering a satisfactory article so that you are willing to come back, also boost for us and induce some of your friends and neighbors to send us their orders.

OUR MOTTO—"WE ARE NOT SATISFIED UNLESS YOU ARE"

This motto means a great deal to the prospective buyer. We live up to it as our business is all done through the mails and our customers must be satisfied if they come back and bring their friends with them. This year we have provided unusually large stocks of the best seed we could obtain, buying these early on lower markets so that we could take the best care of our trade. If you have bought from us you know our qualities are dependable and satisfactory. If you have never bought from us now is the time to begin. We never had better qualities or bigger values in high grade seeds. We want your order and will try hard to merit it by giving you the best seed the market affords and at prices that will save you many dollars on your seed bill. We will go further and give you a most liberal guarantee and will make good on our motto "We are not satisfied unless you are." Send us your order and let us show you how well we can serve you and prove that it is to your interest to buy your seeds from the American Field Seed Company who are the Seedsmen of the American farmer.

CLUB BUYING VERY SATISFACTORY

We are encouraging the buying of seeds in quantity. When the farmers go together and combine their orders, we can make them a very close price and are always glad to reduce our quotations whenever markets or margin of profit will permit. We want the big orders and wish to handle a good many thousand bags of seed during the season. In order to get this big volume, we must have ample capital, big stocks and right prices. We contend that our prices are bedrock and that our qualities are extra high. We handle only good dependable seeds that will give the best of satisfaction. Your order will be well taken care of if you give us the opportunity of handling it.

SEE GREEN PRICE LIST FOR PRICES

This circular is not a complete catalog and quotes only a few special bargain lots. Always keep our catalog for ready reference and our latest price list for prices. Study our catalog together with our price list. Always be free to write for special prices and free samples.

THE TRUTH ABOUT CLOVER

We want to give you some inside information concerning the clover situation which is of vital interest to you. It is absolutely necessary for you to know whether you are buying domestic seed or foreign seed, if you want to be successful in growing the crop. It has been found by numerous and repeated tests that imported seed from southern France and Italy is not hardy or satisfactory for the northern half of the United States. It is a waste of money to buy imported clover that is not hardy which might be a little lower in price than the best domestic seed. Our clover crop is about 700,000 bushels short of last year and this shortage in production will be filled largely by imported seed. The foreign seed has beautiful color, high purity and is accepted when well cleaned as Prime in the Toledo market which establishes the market on clover of the world. The same quality of domestic seed would only grade Prime in Toledo but would sell at a big premium in the open seed market. This is all right for the clover speculators but it is not fair to the seedsmen who are selling domestic clover nor is it fair to the farmer who is buying clover for his seeding. Many small dealers do not know the truth about the situation and will be passing out foreign seed to their friends and customers in good faith and at the same time doing them a great injustice. You can protect yourself against foreign seed by buying the best grade of Pinnacle Brand which will be kept free from imported seed throughout the season. Up to this time we have no foreign seed in any of our regular grades and can recommend them all as being hardy and satisfactory. We must furnish our customers with clover that will satisfy if we expect their continued patronage. We cannot recommend seed from Italy or southern France to you conscientiously as we are afraid it would winter kill and be a failure. However clover from England or northern Europe is considered entirely satisfactory.

Let us supply you with our Pinnacle Brand and have seed that is bound to please.

DEMAND FOR CLOVER EXTRA HEAVY

We are having a tremendous call for our domestic clover. We are selling some of the largest buyers their seed. Orders for 10, 20 or 40 bushels are not uncommon. Many are taking advantage of our club plan and are buying their seed as a unit getting a special price on a large amount. We are specializing on high grade domestic clover and can sell you your seed in bushel lots are carlots. We have the stocks and prices that enable us to offer exceptional values in the best seed. We cannot help but feel there will be a very acute shortage develop in high grade domestic clover so those who wait until seeding time will pay a big premium for their seed or accept foreign seed or off quality which may mean a partial or complete failure. There is nothing more exasperating than to find your clover is a failure while your neighbor's is a success.

The best insurance you can have on your crop is high grade domestic seed to start with.

BEST IS CHEAPEST ON CLOVER

There is no cheap clover except the best. Off grade seed containing noxious weeds is a calamity. High grade seed that is not hardy is likewise a calamity and for the small difference in cost you cannot afford to take any chances on inferior seed of doubtful origin. We stake our reputation on our Pinnacle Brand and believe it will meet every requirement.

CLEANING EQUIPMENT AMONG THE BEST

Our cleaning plant does marvelous work. We have a number of special machines for cleaning which do work that is impossible to believe could be accomplished by machinery. Few seed houses are as well equipped for removing impurities from seed as we are. We put a great amount of labor and cleaning especially on clover. It is a crop that always contains more or less impurities. Cleaning clover seed is a science and we believe we are able to clean seed equal to the best cleaners in the trade. Our clover customers know how well our seed is cleaned and graded and our qualities invariably give the best of satisfaction.

TESTED SEED AND GUARANTEED

Every lot of our seed is tested and tagged. We know the quality we are offering. We do not guess at it but analyze the seed and if it does not measure up to our standard, we reclean it again and again. Some lots of clover are cleaned as high as four and five times before they meet the approval of the high standard maintained by the critical seedsmen. You cannot appreciate how much work is put on the best grades of seed so as to have them satisfactory to the critical seed buyer. You will find our Pinnacle Brand thoroughly recleaned and guaranteed to meet with your approval.

"Everhardy" Red Clover \$14.25 Per Bu.

99 $\frac{3}{4}$ % Pure—Dodder Free—Guaranteed Equal Sample

We are enclosing you sample of Red Clover representing the highest quality of seed we have seen this year. Note the big bold berry, large per cent of blue seed denoting well ripened seed of high germination. This seed is the highest quality of English seed, grown in the same latitude as the southern part of Canada. It cannot help but be extra hardy and most satisfactory. We would not offer it to our customers if we did not know it would grow and give the best of satisfaction. It is even higher in purity than our Pinnacle Brand and the price is decidedly lower. This is a real bargain in the highest testing seed. Order Lot "Everhardy" if you want the finest clover seed ever shipped into your neighborhood. It will save you money. We stand back of this seed with our guarantee and seed will be identical to sample.

LOT EVERHARDY CLOVER \$14.25 BU. BAGS FREE.

Buying these Special Bargains direct from us will enable you to Save Many Dollars on your seed bill.

A BIG SUCCESS

The most successful grass mixture we have ever offered to the American farmer is our Alsike and Timothy mixture. It has been sowed from coast to coast under nearly every conceivable condition and has given practically universal satisfaction. We receive more letters of praise on this mixture than any seed we sell. This is the best evidence we can get that the seed meets with the approval of the customer. The one who uses the seed knows whether it produces a big crop. The letters received convince us that it comes up to their highest expectations and the crops are most satisfactory.

WHY SO POPULAR

The low price at which a seeding can be made is what has made this mixture so popular. It can be seeded at practically the cost of Timothy. In fact we note some seedsmen are asking more money for Timothy alone than we are asking for this splendid grass combination. The alsike that is added to the timothy accounts for the increased production and extra fine quality of the hay. These two crops flourish together and the seed can be produced and often bought at a lower figure than straight timothy. We specialize in this mixture, handling a great many varieties and can offer it at a rock-bottom figure. See catalog page 18 for full description.

SEED GRADED ACCORDING TO ALSIKE CONTENTS CLOVER, ALSIKE & TIMOTHY \$4.90 PER BU.

We have adopted the system of separating our Alsike and Timothy into two grades. Lots that contain less than 20% Alsike are used in our No. 10 grade and lots containing more are put in our No. 20 grade. Every lot is tested to see just what it contains before cleaning and is put up in the best shape for our trade. Our No. 10 mixture is just as good a quality as the No. 20 mixture but contains less Alsike and is sold practically at Timothy seed price. This mixture runs from 10 to 15 Alsike and when seeded 11 pounds to the acre there will be 20 Alsike and 10 Timothy.

ALSIKE & TIMOTHY NO. 10 \$4.40 PER BU.

A VERY RICH MIXTURE

The richest lots of Alsike and Timothy go into our No. 20 mixture. We want this grade to represent the best mixture on the market and we can recommend it in the highest terms. It is not only carefully re-cleaned but contains from 20% to 25% Alsike making a very fine combination for sowing. It is excellent for both hay and pasture and the cost of seeding is the minimum. We are selling unusually large quantities of this mixed seed as it only costs about \$1.25 per acre to sow this richest mixture while most grass seedings cost double this amount. When you can cut your grass seed bill in two and still sow a grass combination that will produce a bumper crop it pays to use it. This is exactly what can be done and is the reason for the heavy sales and the fine satisfaction it gives the customer.

We recommend this seed particularly for land which is inclined to be a little wet as both these grasses flourish in good rich moist soil. The yields are very heavy when used for hay and as a pasture crop it is a big success. The low price and the ease of obtaining a stand makes our Alsike and Timothy a most desirable seeding and something every one sowing grass seed can use. We want your order for this mixed seed, if you appreciate saving money and want our most popular mixture.

ALSIKE & TIMOTHY NO. 20 \$4.90 PER BU.

SWEET CLOVER—THE WONDER CROP

The importance of a Sweet clover crop is realized and appreciated by a larger number of farmers every year. This crop is making great inroads on the use of Red clover. It is surprising to learn of the number of enthusiastic farmers there are who are exploiting the value of Sweet clover. Every state in the union is now growing more or less Sweet clover. The crop first gained popularity in Kentucky and some of the western states where it was saved from waste places growing without cultivation. Today it is the favorite crop in the Red river valley, thousands of acres being devoted to the crop for seed purposes. Many of the best farmers in western Iowa are growing it in preference to alfalfa. In the east the dairymen have found it to be the most profitable crop that can be grown.

More Sweet clover will be used this spring than ever before. Its value is now so well established that every wide awake farmer is aware it is a big money maker.

VALUE AS A PASTURE CROP

We consider Sweet clover better adapted to pasture than it is for hay as it is just a little too coarse in growth to make a fine quality of hay. For pasture it excels for it comes on extra early in the spring, grows very rapidly and one acre will carry five head of stock. This is the reason it is so valuable. A ten acre field of Sweet clover pasture will carry from 40 to 50 head of stock throughout the season while it would take about 40 acres of common blue grass. Sweet clover must be pastured heavily so as to keep it from getting too large. When properly handled the pasturing will cause it to bush out and grow a finer quality of feed and it will continue green and growing throughout the dry months of July and August when blue grass is burned up and then is the time you need Sweet clover most.

PRODUCES IMMENSE HAY CROPS OF HIGH FEEDING VALUE

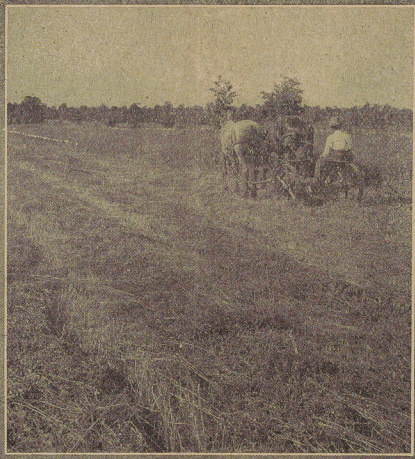

Sweet clover is not equal to alfalfa as a hay crop when it comes to quality as it is coarser and not as easy to handle. However, the feeding value of it is about the same and it is surprising to see how the stock will go after Sweet clover hay. It is high in protein and a ton of it will give about the same feeding results as a ton of alfalfa. The biggest advantage of Sweet clover when it comes to a hay crop is you can grow it on land that will not produce alfalfa. It will grow on the thinnest kind of upland and on ground that is too wet for clover or alfalfa. It will stand as much water as alsike and when seeded with alsike you have the finest combination on the market. Don't fail to use Sweet clover this year as this crop is of the greatest importance and is better in many ways than Hubam, clover or alfalfa.

SUPERIOR FOR FERTILIZING PURPOSES

We consider Sweet clover the most successful soil builder of all the legumes. It has more possibilities and fits into rotation better. A full crop of hay can be secured after cutting your grain crop. Last year in tests it made far more growth after the grain crop was cut than Hubam. We today prefer Sweet clover to any other crop for quick results in the way of a soil builder. You will find Sweet clover will not disappoint but be the greatest money making crop on the farm whether used for fertilizing, hay or pasture. It is also a big money maker the second year when harvested as a seed crop. See pages 14 to 16 for particulars on this crop.

Sweet Clover, when cut for hay, piles up mighty fast. Showing the growth it makes on thin land.

SAVE MONEY

CRIMSON CLOVER \$6.90 BU.

The price on Crimson clover is only about half as high as it was a year ago. You can buy the best new crop seed from us at \$6.90 per bushel. It always has a big call for this variety of clover as it is used extensively in orchards for a hay crop and green manure. It is one of the heaviest producing varieties of clover, making a superior growth and far more satisfactory than Hubam in many ways. It makes its full crop the first year and the cost of sowing is very nominal. Use Crimson clover freely as you can. Save big money by using Crimson instead of some more expensive legume.

VALUE OF CRIMSON CLOVER

Crimson clover is one of the best varieties of clover when it comes to feeding value. When the crop is properly cut for hay it is superior to even Red clover being richer in protein. It is especially valuable for silage purposes and greatly relished by dairy stock. The enormous yields produced makes it particularly well suited for the dairyman. For fertilizing purposes it is unsurpassed and is used very extensively throughout the east and south for the rebuilding of worn out land. It is also the leading crop in many parts of France and Germany. If you are not familiar with this crop you should investigate it at once. Read page 7 of our catalog and arrange to send us your order while seed of high quality is available at the low price now offered.

THE BUMPER HAY PRODUCER

Without question our America's Best Mixture is the heaviest producing grass combination we ever offered. It combines the heaviest producing legume crops such as clover, Mammoth clover, Sweet clover, alfalfa and alsike with timothy so as to give a balanced seeding. The clover and alfalfa will give extra heavy tonnage, the alsike gives a heavy undergrowth, the Sweet clover produces height and more tonnage than any other crop, while the timothy mixed with the legumes increases the yields and helps aid the quick curing after cutting. It is a wonderful combination and cannot help but be a revelation to you. We have sold this mixture the past two years and the results obtained from it are marvelous. We can recommend it to you as the heaviest producing mixture we have to offer either for hay or pasture purposes. You will be delighted with the results and we want you to include our America's Best Mixture with your order.

40% TO 50% CLOVERS—PRICED VERY LOW

While this mixture contains nearly half clovers, already described, it is still priced at a low figure, so that everyone can use it. In fact, considering the amount of clovers in it, we believe it is the cheapest mixture on the market today. We like to recommend this mixture as it gives such excellent satisfaction that it makes a satisfied customer wherever used. Give our America's Best Mixture your careful consideration and see what quantity you can use. Excellent to sow in old pasture or new. Even superior for a hay crop. See page 20 of our catalog for full description.

When buying this mixture you save materially on your seed bill and have the seed sown bulked evenly and ready to sow. The advantages of sowing this mixture are many and the results obtained from it are phenomenal. This mixture has made many new friends for us and this year we want to sell a far larger number of our friends this mixture. You have the finest grass combination we are able to put together for the money invested when you buy our America's Best Mixture. It is a sure winner.

PRICE—25 lbs. \$3.25, 50 lbs. \$6.30, 100 lbs. \$12.50, 500 lbs. \$60.00.

BUY HARDY NORTHWESTERN ALFALFA

We are offering you extra hardy Northwestern alfalfa of the highest quality in our Pinnacle Brand and pricing it at the lowest prices being quoted on high quality seed regardless of where it may be produced. When you can buy seed from us of known origin, why take chances on seed offered by your retail dealer which may be Italian seed, French or from South America. We believe the best hardy domestic seed is what the farmer wants and this is why we are offering domestic alfalfa of the hardest types to you. Read our catalog pages 9, 10 and 11 and learn more about alfalfa.

BUY ALFALFA SEED NOW—MARKET ADVANCING

We are urging our customers and friends to buy their seed early this year. We know the seed situation and are expecting big advances in the market later when the actual seeding starts. You surely will be doing the right thing if you provide for your alfalfa seed without further delay. Our stocks will never be more complete and our prices surely will be higher when we have to go into the market and start replacing the seed we are now selling. Be sure to figure with us on your alfalfa. We undoubtedly can save you money on the best seed. Compare our prices on the best quality of Northwestern seed. Also best Dakota grown and Grimm. We are today selling Grimm alfalfa \$6 per bushel less than some of our competitors. We will save you money if given the opportunity. See price list for prices.

LOT SUPERB ALFALFA \$12.60 PER BU.

HIGH GRADE 99 1/2% PURE—DODDER FREE

In our December circular we offered Lot Superb which is a beautiful lot of seed of Pinnacle quality, but not Northwestern grown, so we are quoting it at a reduced price. This seed is absolutely hardy, high color, high germination and a real genuine bargain. We know this quality is being sold by some jobbers at a higher price to dealers so that our price is under the wholesale quotation. There is only 300 bushels of the lot left and the first comers will be the first served. After this lot is exhausted we will ship you your money's worth in Pinnacle Brand Northwestern seed unless otherwise instructed.

Order today while this lot is available.

LOT SUPERB \$12.60 PER BU.

DO NOT FAIL TO INOCULATE

Proper INOCULATION of the seed is a big factor in securing a satisfactory crop of alfalfa. Since the introduction of the Pure Culture method of inoculation, however, this process has become a very simple one. The expense of securing our Tubercle Germ, which insures perfect inoculation, is very small compared to the results that you will secure from it. We feel that the extra tonnage secured from the first crop will more than make up for the cost of the Tubercle Germ. Do not fail to include Tubercle Germ with your order.

Price—1/4 bu., 60c; 1/2 bu., \$1.00; 1 bu., \$2.00; 5 bu., \$9.00. See inside cover of our catalog for full particulars.

Our customer this year reports that he harvested \$500.00 worth of alfalfa hay off of five acres.

HEADQUARTERS ON HIGH GRADE TIMOTHY

Timothy is our specialty and we handle a great many carloads of it during the season. Our low prices and high quality make our seed very popular with the buyer. Our Pinnacle Brand is 99 1/2% pure, thoroughly re-cleaned and of high germination. We do not believe you can buy any seed that will give better results when seeded. Most of our high grade timothy comes direct from the fields of Iowa, having contracted it in the best producing sections. By handling seed in carlots and contracting early we assembled a fine stock of seed at very low prices. We do not believe anyone can offer timothy to better advantage and it is our belief we can save you good big money on your timothy seed purchases.

ECONOMY TIMOTHY \$3.60 PER BU.

When handling timothy in large quantities it is necessary to grade the timothy so that we have three standard grades, all new crop, well cleaned and a quality that will satisfy and give satisfaction.

Our Economy Brand timothy represents a very nice grade of seed and something we can recommend to you as being the best value you can hope to secure for the money. It is not equal to our Pinnacle Brand but it will give splendid results and is guaranteed to be satisfactory on arrival.

Our Universal grade is excellent timothy and is equal to the best grade handled by many dealers. See catalog page 17 for full particulars on timothy and page 5 for grades.

Pinnacle Brand is our very highest quality and is priced at such a low price that no one need hesitate about buying the best. See price list for prices.

TIMOTHY MARKET IS ADVANCING

We find the market on timothy is very firm and advances have already been made. We are confident that the prices we are now quoting will save every buyer of timothy seed money. We expect to advance our prices to pass up list of March 1, and if you want to save money on your seed, buy now while we can protect the low prices quoted.

SOW ALSIKE THIS YEAR

We find our customers are taking advantage of the low price prevailing on alsike and are ordering it more freely than ever before. We expected big sales on alsike and have provided ourselves with unusually heavy stocks, but our trade is exceeding our fondest expectations. The price of alsike is so low and it has such sterling merit that the farmer who is posted cannot afford to pass up this opportunity of using alsike. The value of alsike is generally recognized and for many purposes is superior to Red clover. The fact that it is a perennial and easier to start and handle makes it particularly well suited for pasture.

CUT YOUR SEED BILL IN HALF

You can do this by sowing alsike instead of Red clover. Use Alsike clover freely on alsike and have provided ourselves with unusually heavy stocks, but our trade is exceeding our fondest expectations. The price of alsike is so low and it has such sterling merit that the farmer who is posted cannot afford to pass up this opportunity of using alsike. The value of alsike is generally recognized and for many purposes is superior to Red clover. The fact that it is a perennial and easier to start and handle makes it particularly well suited for pasture.

PINNACLE BRAND ALSIKE \$11.50 PER BU.

We are making a special price on our highest quality alsike and are enclosing sample of our Pinnacle Brand which we quote at \$11.50 per bushel, good until the last day of February. This special reduced price is made to reduce our stock and to stimulate the use of more alsike. This price is surely too low for the highest quality of seed free from thistle. However, we will protect this price throughout the month of February, but expect to advance it sharply at the end of that time. We want you to appreciate this big bargain in the highest quality of alsike. By examining the sample you will appreciate our Pinnacle quality and know what it is like. The same high quality will be found in our alsike, timothy or other seed. When you place your order with us you will get this high grade seed at a big saving in price.

50 BAGS LEFT LOT JUNIOR

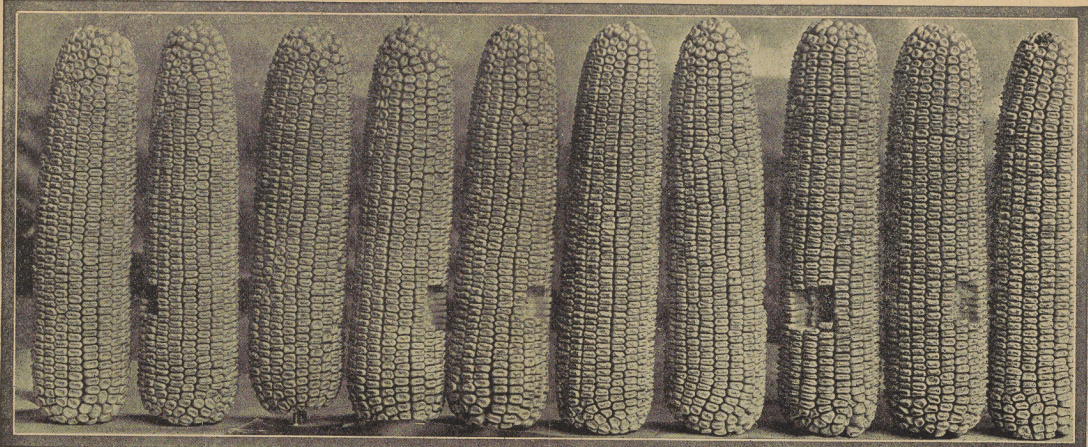

We sent you a sample in December of Lot Junior and quoted it at \$9.00 per bushel. We renew this special offer and will protect this price until Lot Junior is exhausted. This is a big bargain in a quality of seed well suited for pasture purposes. Seed will be fully equal to sample formerly received and we guarantee it satisfactory on arrival.

Lot Junior \$9.00 Per Bushel. Bags Free

SAVE \$3.00 PER BUSHEL ON YOUR CLOVER

You can do this by using a Cyclone Hand Seeder instead of sowing by hand or with some obsolete worn out seeder that wastes four of your seed. Eight pounds of clover evenly distributed with a Cyclone Seeder will give you an excellent stand and far superior to 10 pounds sowed by hand. The saving of 2 pounds of 2c seed to the acre means a saving of \$3.00 per bushel on every bushel of seed used. You cannot afford to be without the best hand seeder on the market. We believe the Cyclone to be the best and the price is so low that you will more than make the cost of it if you only have one bushel to sow. Cyclone Hand Seeder \$2.00 Each.

Guaranteed Seed Corn at Right Prices

SEED CORN CONDITIONS SIMILAR TO 1918

Seed corn is just as scarce in many sections as it was in 1918 when it sold anywhere from \$6.00 to \$10.00 per bushel and hard to get even at the high prices. Prices will not be as high this year as then, as that was during war times and everything sold at war prices. However, do not fool yourself on seed corn. Even if you do pay \$5.00 per bushel for your seed, it is only costing about 70c to plant an acre or about the cost of one bushel of corn. You know how easy it is to reduce your yield one bushel to the acre for if your stand is not perfect you cannot hope for the maximum crop. Poor seed corn is a calamity and nothing will make you feel sicker than to find your corn did not come up and that you will have to replant. If you go through the season tending a half stand, you know you can only produce a half crop. Your loss will be anywhere from \$15.00 to \$25.00 per acre.

WHY TAKE CHANCES ON DOUBTFUL SEED?

You can buy 1922 corn from us that has been carefully selected and tested and guaranteed to grow at a price of 50c per acre. This is the best crop insurance you can get. The 1922 crop was excellent quality, practically all of high vitality. We have tested a great number of samples of new corn and invariably the germination is unsatisfactory and the vitality low. For this reason we have decided to handle the 1922 corn instead as we can stand back of it with a guarantee and furnish our customers with corn that we know will grow. We have a few early varieties of new corn that test very high, secured from early planting and from a section that was not damaged by the first early frost. Our seed corn is all northern grown, well suited for the northern part of the corn belt and we will not ship out seed corn that will not satisfy. We guarantee our corn and sell it subject to your approval and test and give you 30 days to decide whether you are pleased with the seed. What could be fairer? Our customers must be satisfied.

WHY THE CORN IS SO POOR

Many farmers do not appreciate how poor the corn is this year. It looks fairly good but it contains so much moisture it will not keep when shelled and the freezes have destroyed the germ. The continued rains in August and September kept the corn green too long and it did not ripen and dry out, which accounts for the excess moisture. No one can hope to plant 1923 corn and have it all grow, unless they have given each ear an individual test. This takes time and is expensive. Buying your seed corn from us is the cheapest and most satisfactory way. See catalog for description of the varieties and price list for prices.

NORTHERN SEED GRAINS

Space in this circular will not permit us to give you a full description of our different varieties, but we do want to emphasize the importance of northern grown seed. We get our best seed from the north and import Canadian grown seed and have been selecting our stock with great care and have now assembled a very fine lot of the choicest seed. Our heaviest yielding varieties are grown in Canada and we have very fine qualities in our big heavy yielding varieties which are all described in our catalog.

GOOD SEED OATS ARE ESSENTIAL

The past season was very disastrous to the oat crop in many sections and good seed oats are very scarce. We have anticipated a big demand for seed oats and have been selecting our stock with great care and have now assembled a very fine lot of the choicest seed. Our heaviest yielding varieties are grown in Canada and we have very fine qualities in our big heavy yielding varieties which are all described in our catalog.

Read pages 26 to 29 on seed oats. If you want the smaller varieties from the best producing sections all re-cleaned and free from noxious weeds we have them and at prices that are very low for good re-cleaned seed. If you want large quantities write us for samples and special prices. We are here ready to serve and have the prices and qualities that should win you as a customer.

BARLEY IS A CROP OF IMPORTANCE

We do not believe the average farmer gives barley enough consideration and too few find a place for it on the farm. Much land will produce a better crop of barley than of oats. There is no comparison in the feeding value and a bushel of barley weighs a half more than oats so when your barley yields 45 bushels to the acre it is the same as a yield of 60 bushels of oats in weight and worth as much as 80 bushel in a feeding test. You can grow barley successfully and profitably if you plant the right kind. Try our Champion Beardless. It is easy to handle and a big producer in the corn belt. The hullless varieties are excellent, doing especially well in a dry year or in a dry climate. The popularity of the hullless varieties are fast increasing. See pages 30-31 on barley and price list for prices.

SPELTZ AND SPRING WHEAT

We want you to read page 32 of our catalog on Speltz and page 33 on Spring Wheat. Our space is limited but we do know that Speltz is a crop that is very popular with the stock raisers as it produces heavily and has about the same feeding value as barley. If you have never seen the grain write for a sample. We want you to try it in place of oats as we believe you will like it much better. Give it a trial this spring.

We handle only one variety of spring wheat, the New Marquis, which is by far the most popular variety and the heaviest producer we know about. We have a beautiful lot of seed of this excellent variety and can furnish you a start of it at prices that are very low indeed for high grade re-cleaned seed. See price list.

PROLIFIC SPRING RYE—WE HAVE IT

Every year we have a big call for spring rye and oftentimes the demand exceeds the supply. This year we were fortunate in securing a car of beautiful seed of genuine spring rye that we can recommend as being true to name and satisfactory in every particular. Many of you know of the advantages of spring rye and will be pleased to know that we can fill your order. Everyone reading this circular will do well to consider the value of spring rye and figure out whether you cannot sow a limited acreage at least profitably. It makes the finest kind of early pasture for chickens, hogs or other stock and also produces a very paying grain crop.

We are very enthusiastic about spring rye and want every one of our customers to know that we can fill their order promptly with the best quality without fail. Some years we have disappointed many customers on account of not being able to obtain stock of dependable quality. We can now take care of these customers as well as any new ones who wish to start growing a new crop. Our seed grains are all carefully re-cleaned and our spring rye is put up in the best of shape.

Our catalog contains a full description of the crop on page 33. Read descriptions on all our seed grains and refer to our green price list for lowest and latest prices.

SOY BEANS MAKING RAPID GAINS

This crop has come into prominence faster than anyone would believe and is a favorite with the majority of the farmers. It is a money making crop and should be grown by every corn and stock raiser. You cannot afford to raise oats when the same ground will produce 25 bushels to the acre of Soy Beans. Think what 1,500 pounds of beans means to the acre, in the way of feed, when ground Soy Bean meal has a feeding value equal to oil meal and farmers pay from \$40 to \$50 alfalfa. Here is a crop that can be grown by itself and which will make more real money than any small grain you can plant.

EXCELLENT FOR HOGGING DOWN

No crop can be grown with corn that fits the corn growers' needs as well as Soy Beans. By planting with the corn a bushel will plant from 10 to 12 acres and you can grow this auxiliary crop without any extra expense more than the cost of the seed and at harvesting time have a crop that will increase your pork production 50 per cent. When hogging down corn with Soy Beans, the gains are far more rapid than when fed corn alone and this is the reason this crop is so important to the hog raiser. It also makes a greatly improved quality of silage as well as much more of it. Always plant Soy Beans with your corn when hogging down or when using it for ensilage purposes.

A BIG MONEY MAKING CROP

When you raise from 20 to 30 bushels of beans to the acre, you have a crop that makes good money. The oil crushers are willing to pay from \$1.25 to \$1.75 per bushel for beans and when sold for seed purposes they usually bring from \$1.75 to \$2.50 per bushel, the price depending up on the variety and size of crop. Farmers who have been growing Soy Beans have made good money and have built up their soils while doing so. See page 38 of catalog for description and price list for prices.

SPECIAL—SOY BEANS \$2.50 PER BU.

We bought early, before any advance, a carload of A. K. Soy Beans at a very low price and we can turn these beans at a fair profit by offering them at \$2.50 per bushel. We have decided to pass them out during the month of February at this special reduced price and we do not think farmers will be slow in grabbing them as this price is about 50 cents per bushel under the market. The A. K. is one of the best varieties, being similar to the Manchou in growth and in appearance about the same as the Midwest. In fact some growers class the A. K.'s as the same as Midwest, but for planting we believe them to be superior. They are a good variety and the price is extremely low.

1 bu. \$2.50, 4 bu. \$10.00

SUDAN 50% CHEAPER

We are offering you Sudan at half the price that was paid last year at planting time, that the price will be later in the season we do not know but we do know we are selling Sudan at a very low figure. We can undoubtedly save you money on the best grade of re-cleaned northern grown Sudan. We want you to consider the planting of an increased acreage. The price is very attractive to the buyer and the value of Sudan as a forage crop is ace high. We find the farmers who are growing Sudan are delighted with the results. It produces immense crops that are high in feeding value and three to four crops a year. We devote page 41 of our catalog to Sudan and we want you to read this page. The information given is authentic and of interest to every up to date farmer.

SUDAN MUCH CHEAPER TO SOW THAN CANE

Sudan is very cheap to sow compared with other forage crops. It is necessary to sow from 1 1/2 to 2 bushels of cane to the acre costing from \$2.50 to \$3.00 per acre for seed, while you can sow from 20 to 25 pounds of Sudan at a less cost and have a far more valuable crop. The quality of Sudan hay is next to alfalfa. In fact the feeding tests in Kansas show that stock even made more gain with Sudan hay than alfalfa in connection with other grain. For pasture it is equally as satisfactory. It makes a rapid growth and there is nothing better for hogs and pigs. We want our customers to order Sudan freely. We are making very low prices on the best quality and do not think you can buy better seed. See price list for lowest prices.

BILLION \$ GRASS UNUSUALLY CHEAP

We do not believe we ever sold Billion \$ Grass at as low a figure as we are offering it this spring. The demand for this seed is increasing rapidly and it may be before the season is over the price will be materially higher. We have a big supply on hand that we are offering at \$3.75 per 100 pounds and we do know this price pleases the farmer. He likes to buy some things at a prewar price. Billion \$ Grass is one thing he can buy cheap. The crop is a heavy producer and is used very extensively for hay, especially throughout the east. It is a great favorite with the dairymen and we can recommend it highly to them. It will surely please and produce an immense amount of excellent feed. See page 21 of catalog for full description.

Price—25 lbs. \$1.00, 50 lbs. \$1.90, 100 lbs. \$3.75.

BEST HOLLAND GROWN DWARF ESSEX RAPE

Our sales are much heavier on rape this year than last. Our prices are a little lower and we are getting many orders from new customers. Rape is a crop that can be grown with but little expense. It only takes a few pounds of seed to sow an acre and the cost of seed is unusually low. We are selling the highest quality of new crop seed at prices decidedly lower than is commonly asked. If you want to buy the best Dwarf Essex Rape at a low price get in touch with us. We will meet any competition and believe our prices are already lower than you can buy the same quality from any other source.

We can give you the best shipping service and save you money at the same time. Price—25 lbs. \$2.25, 50 lbs. \$4.25, 100 lbs. \$8.25, 500 lbs. \$40.00.

ILLINOIS, THE HOME OF RED TOP

Illinois is the natural home of Red Top and practically the entire seed crop is produced in the southern part of the state. On account of our favorable location, we are in better position to offer Red Top than many seed houses that are more distantly located. We give special attention to the buying and procure our stocks at the time the Illinois fields are usually ready to start a new crop. This gives us a great advantage. Our prices on Red Top are never high and oftentimes far lower than generally quoted. Right now we have extremely low prices and on extra fine quality in our best grade. You surely will be acting wisely in buying your Red Top from us. See page 22 of catalog for full description and price list for prices.

BROMUS INERMIS GREAT FOR PASTURE

Bromus Inermis is a crop that will produce wonderful crops and is especially well suited for pasture purposes. We do not want anyone to overlook the value of Bromus as it more than pleases the farmer and is easy to start and conservative in seed. Our prices this year are lower than commonly quoted and now is a good time to start growing this crop. Read description in catalog and include Bromus on your order. See price list for prices.

American Field Seed Company

43rd. and ROBEY Sts., CHICAGO, ILL.

Farmers' Wholesale Price List

January 20th, 1924

Our prices all include bags free for shipping and are f. o. b. Chicago. All items have been cut to rock bottom. We cannot protect these prices after present stocks are sold. These prices must therefore be made subject to prompt orders. Quotations are subject to change without notice. Protect yourself by buying at once.

Buy Your Seeds Direct From Headquarters, To Save Most.

We deal directly with the Farmer, selling the best quality at the lowest prices. Our wholesale prices to the farmers are often lower than the prices quoted dealers.

Make an Extra Saving on your Seed Bill by Buying Early

Crops Short—Markets Advancing—Best Goes First

BUY YOUR SEEDS NOW

Now is the time to buy your seeds. We are offering exceptionally big bargains in seed at this time and will not again be able to duplicate these values. We have bought our stocks to good advantage and are passing them along to our customers on a very close margin and feel sure that the low prices we are now quoting will be appreciated by our customers and a flood of orders will be forth coming as soon as this price list reaches the hands of the farmer who needs seeds. Everyone now realizes that prices on practically all commodities are on the increase and farm products are just now starting to share in the prosperity which is gradually coming back. We look for the next few years to be very prosperous ones for the farmer. In order to make money it is necessary to plant freely and buy your seeds wisely. We can save you money on the best quality if we have the opportunity. On advancing markets it is necessary to buy today for those who put off until tomorrow may be too late. Act now while the best is to be had at the least cost.

BUYING FROM US REAL ECONOMY

You are practicing real economy when you send to headquarters for your seed. We specialize on Grass and Field seeds and for this reason are better prepared to serve the buyer of this class of seed. We buy our stocks to advantage and sell them to advantage owing to our favorable location and the big volume of business done direct with the farmer. We want your order at this time for we are sure buying from us now will prove profitable and real economy to the Seed Buyer.

QUALITY BACKED BY GUARANTEE

We not only sell our seeds at low prices, but we give you the utmost protection. We sell them on 30 days' approval and subject to any test you wish to make. If our seeds are not all we claim for them send them back and receive your money. We are in business to serve the seed buyers and to give them the best seed money will buy at the least possible cost to them. These prices will speak for themselves and our guarantee backs every offer and every pound of seed sold so every buyer is fully protected.

SERVICE UNEXCELLED—QUICK SHIPMENTS OUR HOBBY

We appreciate the need of quick service in the seed business and we are located so as to give the very best of service. We can make shipments generally the day order reaches us and our location permits them to be started rolling your way 24 hours after the orders reach our office.

OUTLOOK IS FOR HIGHER PRICES

Every indication points to higher prices in the seed business and this early price list should be the means of saving the farmers thousands of dollars on their seed purchases, now is the time for action. Make out your order and send it in to us before there are any further advances in prices. We are giving you our best judgment when we urge you to buy your seeds now. Your orders will have our best attention and we guarantee satisfaction.
